SUMMARY

Implementation specialist who takes complex e-commerce sellers from signed contract to live, self-sufficient, and off the support queue. 20+ implementations delivered, up to 10 concurrent, on catalogs as large as 900K SKUs and inconsistent supplier feeds. Six years running e-commerce operations before moving to the vendor side, so I scope a client's business into platform configuration in their language and debug integration failures at the API and data layer.

ONBOARDING & IMPLEMENTATION EXPERIENCE

Onboarding Specialist, SureDone Inc.

New York, NY (Remote) · Dec 2024 – Present · Multichannel e-commerce listing platform

- Own client implementations end-to-end: kickoff and discovery, statement of work, channel launch, handoff to support. 20+ delivered, as many as 10 concurrent, as the platform's only onboarding specialist since early 2026.
- Trained an external agency to deliver onboardings independently: wrote the runbooks and process documentation, then ran the live training.
- Handle the platform's most complex catalogs: automotive and powersports, up to 900K SKUs with fitment data and supplier feeds that rarely match their stated schema.
- Translate how a client runs their business into platform configuration and custom automation, and write the technical requirements engineering builds from: data mapping, bulk imports, channel requirements, inventory and pricing logic, order routing.
- Built an AI-assisted workflow for the repeatable parts of onboarding: data transformation scripts for supplier feeds, first-draft requirements docs and client runbooks, and faster log triage, with output validated against live client data before it ships.
- Act as the escalation point for complex implementations, diagnosing failures across marketplaces, storefronts, supplier feeds, and imports through logs and API behavior to isolate root cause rather than symptoms.
- Join sales calls as the technical resource: scope prospect requirements, answer feasibility questions, and flag what will and won't work before it becomes a signed commitment.

E-Commerce Implementation Consultant (Contract), NextGen Web Solutions

Mentor, OH · Jun 2020 – Dec 2025 · Contract engagements for small-business sellers

- Implemented Shopify and Amazon builds for small businesses end-to-end: requirements, configuration, launch, and training the owner's team to run it without me.

E-COMMERCE & TECHNICAL OPERATIONS EXPERIENCE

E-Commerce Specialist, Central Garden & Pet (TDBBS Brands, acquired)

Neptune City, NJ (Remote) · Feb 2023 – Jul 2024

- Shut down 80 unauthorized sellers who had hijacked our top Amazon listing, shipping a cheaper substitute product under our brand and holding the Buy Box at well below our price. Recovered roughly \$200K per month in margin on that listing.
- Built the case over a year: test-purchased from every seller to prove the substitution before filing, then enrolled the brand in Amazon Transparency so the listing could not be hijacked again.
- Doubled page speed, cut media file sizes 90%, and reached WCAG compliance in under three weeks.

E-Commerce Leader, Advanced RV LLC

Willoughby, OH (Hybrid) · Jan 2021 – Jan 2023 · Owned e-commerce, web engineering, and internal IT

- Grew Shopify sales 150% through catalog and product data work, SEO, storefront speed, and fast direct response to customer questions.
- Turned the questions I kept fielding by phone into product page content, so buyers could self-serve instead of waiting on a callback.
- Rebuilt the corporate site from WordPress to a headless Next.js and Contentful stack, cutting load times and feeding qualified traffic to the store.
- Trained and mentored the shipping department on new workflows, drawing on my own time managing it.

Shipping Manager & Purchasing Manager, Intellitronix

Eastlake, OH · Aug 2019 – Apr 2020

- Redesigned shipping workflows and automated manual steps, cutting turnaround time on outbound orders.
- Negotiated supplier agreements that cut shipping material costs 80%.

SKILLS

Onboarding & Implementation: Pre-sales scoping, discovery, statements of work, requirements docs, data migration & mapping, launch planning, client training, escalation, handoff to support

Platforms & Channels: Shopify (incl. Liquid), Amazon Seller/Vendor, Amazon Transparency & brand protection, Walmart Marketplace, SureDone, Contentful, Rebuy, Recharge
